NOVEMBER MEETING AGENDA

Program: Tim Harvey
"Namibia; Just Add Water"

Plant of the Month: Don Hunt
"Tylecodon"

Mini Workshop: Peter Walkowiak
"Growing Plants from Seed"

Coffee in the Garden: Chris Miller

Brag Table:
Faux Cactus

Saturday, November 12, 2011, 1pm to 4pm
Casa Del Prado, Room 101
Balboa Park

Plant Sales Begin at 10am
Workshop Begins at 11:00am

PRESIDENT'S MESSAGE

1 November 2011

Good grief, a 90 degree plus day the last week in October. Weird weather for sure. A warm Halloween night is better than a wet one. Several scary, interesting, and pretty costumes visited my doorstep last night. The 31st is also the anniversary of the night **BJ** and I met. We spent it as romantically as usual. I was out front giving out candy and he was in his office on the computer.

October's meeting was a bit long but enjoyable. **Kelly's** slide show on Dudleyas was lovely and we all enjoyed **John Trager's** trip to Oaxaca Mexico. **BJ** gave a workshop on digital photography and I hope those of you that attended have used the information. If you have any questions about **BJ** topics contact him at bjmiller@cox.net. **Jim Dice** dropped by and shared some information on Anza Borrego's acquisition programs that our donations support.

On the 22nd of October several of our members attended the Coffee in the Garden Tour at **Frank** and **Susan Oddo's** home. Birdsong is a lovely series of gardens and we all enjoyed the tour. A combination of art and interesting plantings made the gardens very unique and I am sure our members took away lots of ideas for things to do in their yards. Thanks to **Frank** and **Susan** for having us. The November tour will be

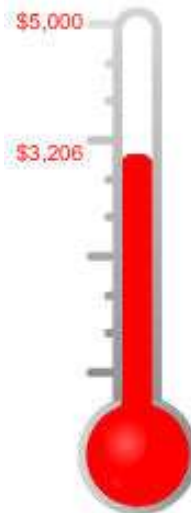

The Miller's Home by **BJ Miller**

at my house. This is a very different garden from the last two. It is more of a study in how to put 40 pounds of plants in a 20 pound pot. Not to mention some examples of what not to do. See

the information in the newsletter.

The Faux Plant Brag Table is happening at the November meeting! I know some of you have your plants ready. But the rest of you still have a few days to get it together. Remember, no regular plants for the Brag Table this month.

Progress toward Anza-Borrego Goal

The November meeting is the cut off for making donations to the Anza Borrego acquisition fund so bring your checkbooks and give your checks to **Ken Blackford**.

I'd like to give a personal thank you to **Ken Kelly** and **Steve Salley** for their donations to the Benefit Drawing Table at the October meeting. **Ken**, on a regular basis, donates plants and other things to the table. **Steve** donated 4 books that caused an increase in ticket sales, obviously to the benefit of the SDCSS.

The Strategy Owners will be looking for support, help, team members. Their first goal is to have three action items ready to work on by the next board meeting. The Strategies we have selected to work towards our goal are as follows:

1. Develop a culture of involvement – Owner is **Steve Harris**
2. Build and maintain an active membership - Owner is **Ken Blackford**
3. Improve promotion of SDCSS – Owners are **Candy Garner & Kathy Harris**
4. Develop and improve all aspects of Education – Team Leader is **Vanessa Nelson** (Team members include **Kelly Griffin, Don Hunt, Chris Miller**, Tours Chair TBD, Workshop Chair TBD)

Be sure to attend **Peter Walkowiak's** workshop on growing from seed. It starts at 11:00 before the regular meeting.

Enjoy your gardens in the cooler fall weather. Now is the time to clean up and winterize. Have fun!

Chris Miller

Workshop "Growing Plants from Seed" Peter Walkowiak

Growing plants from seed offers many advantages and many plants can only be propagated or look their best from seed. For others it's a numbers thing. You can propagate many *Astrophytum* and *Ariocarpus* from seed but only a few from cuttings or divisions. I will be holding a seed seminar at 11am to do a demonstration and to answer your questions on growing plants from seed. I will be providing starter trays for cactus and *Ariocarpus* and *Astrophytum* seed for those attending. The number of trays is limited so a sign up sheet will be provided.

A Tribute to Carol Anne Wujcik From Woody Minnich

On Wednesday, September 28th, 2011, we all lost a great friend, a wonderful and compassionate person, and a lover of the world's natural treasures. **Carol** passed from a heart attack at 7:00 pm in her home in Fallbrook, CA. She was in the presence of her loving husband **Joe**, their housekeeper and their family of cats. **Carol** was born on September 1, 1943 in the town of Manhattan, Kansas and is survived by **Joe**, her siblings **Bill**, **Peter** and **Steff**, her father, her numerous friends, and all of her special kitties and plants.

Having known **Carol** for over 30 years, I was asked and am honored to write this tribute to **Carol** and her amazing life. Anyone who knew **Carol** quickly became aware that she was a very compassionate, philosophical and a giving person. Not only did she give so much of herself to **Joe**, her friends and her many prized four legged creatures, but she also gave greatly to the betterment of humanity.

Her contributions to the cactus, succulent and bromeliad worlds were never ending. She was the newsletter editor for many years of the Long Beach Cactus club and was soon made an honorary life member of that club, the oldest C & S club in the United States. She was also one of the inspirational persons for the foundation of the Inter-City Cactus and Succulent Show. Due to her wonderful ability to promote others, she soon became the pre- and post-show newsletter person for the ICCSS. It was from this forum that her photography and positive journalism were really recognized. She is without a doubt one of the major reasons for the philosophy and great success of the ICCSS show today. Over the last number of years, she and her husband **Joe** have been producing a superb newsletter for the Saddleback Bromeliad Society. As a writer, photographer and an overall promoter of people, **Carol** has definitely set the standard and left her mark for all newsletter persons to emulate.

Carol also had a tremendous enthusiasm for the wild outdoor places, especially our own south west USA. Once living in California, she soon became familiar with the stark and dramatic Mojave Desert. On one of her first trips into the Mojave, the Clark mountain region, she was instantly taken by the often spiritual experience of sitting around the campfire and enjoying the stellar light shows. We were lucky to travel with **Carol** and **Joe** on numerous trips into the US deserts, as well as many trips into majestic Baja California, Mexico. During these later trips, **Carol**

quickly learned to embrace the joy of campfire margaritas and philosophical conversations. She was well known for her deep and spiritual questions, such as; "What is the meaning of life?" and "If there is reincarnation, what would you like to come back as?" **Carol** would often say, "I would like to come back as one of my dogs, they have such good lives." I will always remember myself and a few others dragging **Carol** up the mountain at Cerro Bola, Mexico, to see her first *Astrophytum coahuilense* by star light. She was glowing with excitement, a moment that I'm sure, she also never forgot.

Carol had a tremendous affect on us all. From shows, to the great outdoors, to gatherings of cactus, succulent and bromeliad people, she touched our hearts and our imaginations. All three of my children saw **Carol** like a godmother and my daughter **Sarah** said, "I'll never forget going to **Carol's** home and dressing-up her cats in beads and hearing **Carol's** most wonderful, joyful laughter." Those of us who knew **Carol** are very lucky. I hope we can pass on her love and appreciation for nature's wonders and her desire to bring people closer together.

With love, from **Woody** and all who knew her.

Coffee in the Garden With Chris and BJ Miller

We would like to invite you to Coffee in the Garden at the Miller's. In 1989 we moved into our house in Santee. Over the years the garden has been transformed to what it is today. Other than some Oleander bushes at the top of the hill and one large Jade, tree every other square foot of dirt has been transformed to what it is today. This has been a gradual evolution as time, energy and money became available. This is an example of what anyone could do (if they were a little crazy). We have cactus, Euphorbias, Aloes, Agaves and other succulents in the ground along with a large collection of Gasterias and other cactus and succulent plants in pots.

Azania plants will be for sale, with the proceeds benefiting the gardens at the SD Zoo Safari Park, so bring a box.

When: Saturday, November 19th, Noon to 2 pm

Where: 10042 Waynecrest Lane, Santee. Its easy to get to: take the 52 east to left on Mast Blvd to left on Cuyamaca Street to right on Beck Drive to left on Waynecrest. Our home is on the left, fronted by our Cactus garden! You can't miss it! (see photo on page 2.)

Program

“Namibia; Just Add Water”

Tim Harvey

Mention of the word Namibia often brings to mind the bleak, intimidating skeleton coast, or barren, red sand dunes of the Namib desert. Less common are thoughts of a verdant and plant-filled wilderness, yet this is currently the case; a result of several consecutive years of exceptional rainfall. A trip in March/April 2011 forms the basis of this talk, which highlights the effects that a little (or in some instances, a lot!) water can bring about.

Home to many of the plants we love to grow, e.g. most of the pachycaul *Cyphostemma* sp., the talk will highlight plants from the summer rainfall region, from the northern border with Angola, south to the Khomas Hochland plateau around the capital Windhoek. En route, the flora, including *Euphorbia*, *Aloe* and numerous bulbs and *Stapeliads*, to name but a few, will be illustrated in the majestic scenery that is their habitat. Cultivation of these plants in Southern California will also be discussed.

Possibly a *Cyphostemma* hybrid. **Tim Harvey**

Bio:

If you have not heard Tim talk, you might not know that he is originally from England. He moved across the pond in 1992, falling a little short, working Toronto for a couple of years. He completed the trip to California when he went to work in the Biotechnology industry. He was also able to relocate his cactus collection, started 20 years earlier, to a more favorable climate. Escaping with his morals in tact in 2006, he became a full-time propagator and pollinator of his favorite plants. He makes frequent appearances at clubs in Southern California, either as a speaker, or as a vendor at sales. He has a passionate interest in ex-situ conservation through propagation, and was able to use his scientific training to enliven the micro-propagation facility at the Huntington library. Never able to walk past a plant in flower without trying to pollinate it, he is a keen hybridizer, with the pachycauls, *Aloe* and bulbs in his collection being defenseless subjects for experimentation.

Faux Cactus and Succulent Brag Table

The Brag Table at the November meeting will be full of faux plants made by members. This is your chance to get creative and develop plants that are fun and a bit twisted, not unlike the real ones. An example would be *Oreocereus* made of oreo cookies. The ground rules are:

- No obvious plant material used
- Staged
- Pest free
- Plant name must be Latin based
- The more unlikely the materials the better
- Artistic license is encouraged

Please participate, who knows, if you win your special plant could make the cover of the newsletter, which is almost as good as making the cover of the Rolling Stone!

Faux Plants Created for the 2010 Competition

Best Use of Bedspread, *Saguaro chenillensis*, **Juergen Menzel**

Best Use of Heavy Metal, *Bronzocactus kiki kiki*, **Pam/Lee Badger**

Best use of Rock, *Ariocarpus retusus* v. *lapis*, **John Mellein**

Best Use of Air, *Tephrocactus hydroballoonensis*, **Candy Garner**

Photos by **Collette Parr**

Plant of the month

“Tylecodon”

Don Hunt

ty le CO don or ty LEC o don

The first sounds like a pill for headaches, but the second sounds like a dinosaur, so I'm going with

Tylecodon

is a genus endemic to the winter rainfall area of Southern Africa, from the southwest tip of the West Cape, keeping to the fog belt, north to about Luderitz in southern Namibia. The eastern extreme is about Port Elizabeth, not extending into the summer rainfall area of Eastern Cape.. The range of Tylecodon extends inland along the Orange River in Namibia. This habitat is called karroid, made up of the Greater Karoo to the north and the Lesser Karoo to the south. It is mostly considered semi desert and in the hottest driest environments, plants are usually confined to cooler south facing slopes.

While these are considered winter rainfall areas, fog and dew can exceed the rainfall by a considerable amount, as much as 3 times the rainfall according to some studies. This suggests to me offering plants some watering throughout the year. Tylecodons lose their leaves in the late spring completely, but transpire through their stems without any water. The smaller species will desiccate considerably. During the dry summer months, without any leaves, the plants flower. In nature, there is little competition for pollinators, as there would be in the rainy season. The inflorescences are persistent, offering some protection from predators and the sun. *Tylecodon* and *Cotyledon's*

Tylecodon reticulatus

Tylecodon hybrid

chief protection against predation is probably chemical. They are notorious in the Karoo as livestock killers as there is a severe neurologic and muscular reaction in herbivores. An interesting feature is that scavengers eating the carcasses of the victims are also poisoned.

There are lots of really great dwarf species that are even now being discovered. Unfortunately, they are not common in cultivation. Those that are in cultivation include *T. paniculatus*, which is the largest *Tylecodon*, and may reach 7ft in nature. This should be a great plant for xeriscape gardens in Southern California and deserves to be more popular. It has presence of size, peeling bark, grows bright green leaves with winter rains. It's natural habitat closely resembles Southern California in rainfall and temperatures generally. *T. wallichii* is the species most often associated with “krimpsiekte”, the *Tylecodon* poisoning, which has resulted in general eradication in farmlands. It is a smaller plant than *paniculatus*, sparsely branched which are covered with long phyllopodia (phyllo =leaf podia=foot) giving the branches a knobby look. Quite similar to *T. wallichii* is *T. cacalioides*, distinguishable mainly by it's yellow flower. Like most *Tylecodons*, the inflorescences

Tylecodon bucholziana and flower

are 2 to 3 feet long, rising above any nurse plants they may be growing under. The *Tylecodon* with the most striking flowers is the aptly named *T. grandiflorus*. It's relatively smaller plant, but has the largest flowers of the genus which are orange to red. In my opinion, the *Tylecodon* which is a must have for any succulent collection is *T. bucholzianus*. The stems themselves are the attraction here with a delicate texture and silvery coloring — tightly branched little sculptural arrangements, begging for a cool pot. The leaves are inconsequential little green sausages. Flowers are held close to the structure here and again are very delicate in appearance. All the *Tylecodons* I have experience with propagate easily from cuttings. The stems are somewhat fragile or brittle and break off easily, so it's nice that they root quickly. It's good to have some plants to play with while the majority of the collection is dormant, so watch for *Tylecodons* at the plant sales. You won't be disappointed.

3 Tylecodon photos by Don Hunt

Holiday Party! Saturday December 10, 11am

Well, it's that time again - time to get together, celebrate the Holidays, have some good food and drinks, enjoy each others company and get some new plants!

We are excited about having Ruth Henricks back by popular demand as our caterer again this year. We have chosen a menu with something for everyone - so bring a good appetite. Herb Stern "The Wine Guy" will once again set up a bar with all kinds of refreshments so you can come thirsty too! As part of our sharing with each other we have a tradition of doing a "potluck" dessert table - this is optional -if you have a special dessert you'd like to prepare or something you want to bring - please do - we always have an incredible selection of yummy stuff to finish off our meal.

Gift Exchange This is another fun sharing thing many of us have enjoyed over the years. This is optional - if you want to participate, bring a nice plant or plant related item for the exchange - **ONLY ONE ITEM PER PERSON PLEASE.** At some point a committee will select one of the plants as best (this can be a tough job!). That plant will be set aside to be auctioned off later. The person who brought in that plant will get first choice from the remaining plants - and the owner of the plant that person selects then gets a chance to select and so on and so forth until all plants are distributed. As you can see the nicer the plant/item you bring the sooner you will get to choose. So look through your collection and see if there is some lovely plant you would like to gift to a fellow member and bring it to the GIFT EXCHANGE TABLE - be sure your name is on the plant. This is open to guests also so if you are bringing a nonmember guest - let them know!

Gift Plant The Society will continue the tradition of giving each member who attends this event a gift plant. These plants will be distributed during desserts by lottery. When you arrive be sure to check in at the door to receive your ticket for the drawing. This year's plants come from nurseries far and wide and some truly exotic ones will be available. Take some time to look them over so you will be able to grab your favorite when your number is called. (this is a benefit of membership - no gift plants for guests)

Auction Again this year we have engaged a PROFESSIONAL AUCTION TEAM to handle our Annual Holiday Auction. We have received a donation of 'bare root' plants from Western Cactus Growers so come prepared to bid on the best array of auction plants we have ever assembled. (P.S.

If you have 1-2 "show quality" plants you would like to donate to the auction - please contact Lee Badger 619.589.1456.)
If this sounds like way too much fun to miss - be sure to get your reservations in ASAP (call Chris Miller if you have not yet made your reservations) and join us for the "Best Holiday Party" of the Season. Cut off will be the 5th of December.

Holiday Party Sign-Up Sheet

Members \$20, Non-members \$25

NAME	AMOUNT	MEMBER	NON-MEMBER

Bring your payment and form to the November meeting or, if you are not going to attend the meeting, send it to
Chris Miller, 10042 Waycrest Lane, Santee CA 92071

Memberships about to expire

Many of you have memberships that will expire December 31, 2011! Members are strongly urged to forego the mailed, hardcopy version of *Espinās Y Flores*, and accept only the e-mailed version. The cost of membership remains \$15 per year for E-mail, \$20 for mailed hard copies. New membership forms are on the back of the hard copy cover sheet and can be found in the electronic version. Your renewal payment should be accompanied by the properly filled out form and received by December 31,

The due date for submission of all material to be published in EyF will be the second-to-last Saturday of the month preceding the next monthly meeting. All submissions are to be made to the Editors. Please e-mail your articles to **Paul & Carol Maker** at pdmaker@roadrunner.com.

Advanced

- 1st Place, **Peter Walkowiak** - *Pelargonium carnosum*
- 1st Place, **Rudy Lime** - *Operculicarya decaryi*
- 2nd Place, **Peter Walkowiak** - *Uncarina roeoesliana*
- 2nd Place, **Phyllis Flechsig** - *Pachycormus discolor* (30+yrs, seed grown)
- 3rd Place, **Kelly Griffin** - *Aloe cv 'Pink Delta' ksg*

If an award was missed please let me know.

Happy thanksgiving to all

*T'was the night of Thanksgiving,
But I just couldn't sleep.
I tried counting backwards,
I tried counting sheep.*

*The leftovers beckoned-
The dark meat and white,
But I fought the temptation
With all of my might.*

*Tossing and turning with anticipation,
The thought of a snack became infatuation.
So, I raced to the kitchen, flung open the door,
And gazed at the fridge, full of goodies galore.
Gobbled up turkey and buttered potatoes,
Pickles and carrots, beans and tomatoes.*

*I felt myself swelling so plump and so round,
Till all of a sudden, I rose off the ground.
I crashed through the ceiling, floating into the sky,
With a mouthful of pudding and a handful of pie.
But, I managed to yell as I soared past the trees...
Happy eating to all--Pass the cranberries, Please!*

*May your stuffing be tasty.
May your turkey be plump.
May your potatoes 'n gravy have nary a lump.
May your yams be delicious.
May your pies take the prize.
May your Thanksgiving dinner stay off of your thighs!!*

HAPPY THANKSGIVING TO ALL!!
Poems provided by Jan Kennedy
Shelby (Michigan) Gardeners

Snacks for the Break:

If your last name begins with N-Z, please bring a snack to share at the break.

Elibet's corner

Who's minding the shop?

CSSA Corner November 2011

All CSSA members should be sure and vote for directors using the ballot in the To The Point in the next Journal.

The first ever **Myron Kinnach Lifetime Achievement Award** was given to **Myron** at the Huntington Succulent Symposium on September 3. The award will be presented at the Symposium in non-Convention years.

Orchid for sale, but brag-worthy!

Garner's *Ariocarpus fissuratus*

Bryan's *Stapelia gigantea*

Miller's *Islaya islayensis*

Kelly Griffith's *Aloe 'Pink Delta'*

Garner's *Pseudolithos eyelensis*

UPCOMING EVENTS

Dec. 10: SDCSS Holiday Party! Starts at 11:00am, dinner at 12 noon, in Room 101, Casa del Prado, Balboa Park. Gift plants, auction, gift exchange, FOOD and DRINK! Come meet your co-succulent lovers!

Feb 11: SDCSS annual Winter Show and Sale.

Electronic Espinas Y Flores

The newsletter is available for viewing and downloading at the Club website, www.sdcss.net. Take a look! All members are urged to accept the e-mailed version of the newsletter in lieu of a bulk-mailed hard-copy. Each month, you will be notified by e-mail of the availability of your next issue, the speakers and events at the next meeting, and other significant announcements. **The electronic version contains extra color images not found in the hardcopy**, and a high resolution version, from which fully detailed images can be downloaded, is also available. Further, updates and errors found in the hardcopy are corrected in the electronic version. To cancel your hard copy, contact the membership chairperson **Collette Parr** at collette.parr@cox.net.

SDCSS WANT ADS

If you are looking for a way to help here are some ideas:

Strategic Team Members to support the Strategy Owners in initiating changes in SDCSS	Ride coordinator: Point of contact for those members who need a ride to meetings and those willing to give rides.	Trophy Sponsorship: We are in the process of updating trophies and are looking for donations to support the process.
Tour Chair to arrange Coffee in the Garden tours on a monthly basis	Workshop Chair to run workshop program, set up speakers and topics	Trophy Chair to maintain trophies and oversee their refurbishment
Volunteers for WAP Gardens: For garden maintenance, new area development, plant identification and to work in the greenhouse, Our next project will be to build a greenhouse and we hope to start later this fall	Holiday Party Decorating Committee Members: to help decorate for the Holiday Party.	

Contact **Chris Miller** if you are interested.

Opinions expressed in articles and editorial comments are solely the opinions of the author or the editor and do not necessarily represent the opinion of the SDCSS, the Board of Directors or the organization as a whole. All material submitted to the *Espinas Y Flores* for possible publication may be edited in form and content.
