

DIVISION I: CACTI (CACTACEAE)

|  |     |
|--|-----|
| Acanthocalycium                        | 1   |
| Acharagma                              | 2   |
| Ancistrocactus                         | 3   |
| Ariocarpus                             | 4   |
| Arrojadoa                              | 8   |
| Astrophytum                            | 5   |
| Austrocylindropuntia                   | 24  |
| Aylostera                              | 26  |
| Aztekium                               | 6   |
| Bergerocactus                          | 8   |
| Blossfeldia                            | 7   |
| Browningia                             | 8   |
| Buiningia                              | 7   |
| Cactus, Seed-Grown by Exhibitor        | 36  |
| Carnegiea                              | 8   |
| Cephalocereus                          | 8   |
| Cereus                                 | 8   |
| Chamaecereus                           | 1   |
| Cintia                                 | 26  |
| Coleocephalocereus                     | 7   |
| Cipocereus                             | 8   |
| Cleistocactus                          | 8   |
| Collections: Cactus set of 3 different | 105 |
| Columnar cacti                         | 8   |
| Consolea                               | 24  |
| Copiapoa                               | 9   |
| Coryphantha                            | 2   |
| Crested Cacti                          | 30  |
| Cylindropuntia                         | 24  |
| Denmoza                                | 10  |
| Discocactus                            | 7   |
| Disocactus                             | 14  |
| Echinocactus                           | 11  |
| Echinocereus: pectinate spines         | 12  |
| Echinocereus: straight spines          | 13  |
| Echinofossulocactus                    | 27  |

|   |    |
|---|----|
| Echinopsis                                      | 1  |
| Epiphyllum                                      | 14 |
| Epiphytic Cacti                                 | 14 |
| Epithelantha                                    | 6  |
| Eriosyce  | 15 |
| Escobaria                                       | 2  |
| Espostoa  | 8  |
| xFerobergia                                     | 11 |
| Ferocactus                                      | 11 |
| Frailea   | 7  |
| Grusonia  | 24 |
| Gymnocactus                                     | 29 |
| Gymnocalycium: clustering species               | 16 |
| Gymnocalycium: solitary species                 | 17 |
| Hamatocactus                                    | 11 |
| Hattiora  | 14 |
| Horridocactus                                   | 15 |
| Hylocereus                                      | 14 |
| Lepismium                                       | 14 |
| Leuchtenbergia                                  | 11 |
| Leuenbergeria                                   | 18 |
| Lobivia   | 1  |
| Mammillaria hooked spines, solitary species     | 19 |
| Mammillaria hooked spines, clustering species   | 21 |
| Mammillaria straight spines, clustering species | 22 |
| Mammillaria straight spines, solitary species   | 20 |
| Matucana (submatucana)                          | 10 |
| Melocactus                                      | 23 |
| Micranthocereus                                 | 8  |
| Miniature Cacti less than 3 inches              | 31 |
| Miquelopuntia                                   | 24 |
| Monstrose Cacti                                 | 32 |

|  |    |
|--|----|
| Myrtillocactus                           | 8  |
| Neochilena                               | 15 |
| Neolloydia                               | 2  |
| Neoporteria                              | 15 |
| Notocactus                               | 25 |
| Obregonia                                | 6  |
| Opuntia                                  | 24 |
| Opuntiods                                | 24 |
| Oroya                                    | 10 |
| Ortegocactus                             | 6  |
| Other Cactus                             | 35 |
| Parodia                                  | 25 |
| Pediocactus                              | 3  |
| Pelecyphora                              | 6  |
| Pereskia                                 | 18 |
| Pilocereus                               | 8  |
| Pilosocereus                             | 8  |
| Pterocactus                              | 24 |
| Pyrrhocactus                             | 15 |
| Rebutia                                  | 26 |
| Rhipsalis                                | 14 |
| Rhodocactus                              | 18 |
| Schlumbergia                             | 14 |
| Sclerocactus                             | 3  |
| Selenicereus                             | 14 |
| Soehrensia                               | 1  |
| Stenocactus                              | 27 |
| Strombocactus                            | 6  |
| Sulcorebutia                             | 26 |
| Tephrocactus                             | 24 |
| Thelocactus                              | 28 |
| Trichocereus                             | 8  |
| Tunilla                                  | 24 |
| Turbincarpus                             | 29 |
| Uebelmannia                              | 7  |
| Variagated Cacti 50% or more variegation | 33 |
| Weingartia                               | 26 |
| Zygocactus                               | 14 |
